

MUKIRIA TECHNICAL TRAINING INSTITUTE

HOSPITALITY DEPARTMENT

BUILDING DEPARTMENT

INTERNAL EXAMINATION

WRITTEN ASSESSMENT 2

Time: 2 HOURS

COURSE NAME: Hospitality level 5 &6, Land Survey Level 5 & 6

COURSE CODE: 061155101A

UNIT NAME: APPLY DIGITAL LITERACY

UNIT CODE: AGR/CU/EXT/BC/01/5/MA

CLASS: FB55/6/J/25, LS5/6/S/25

SERIES: SEP – NOV 2026

INSTRUCTIONS TO CANDIDATE

1. This paper consists of two sections **A** and **B**;
2. Answer **ALL** the question as guided in each section;
3. Marks for each question are as indicated in the brackets;
4. You are provided with a separate answer booklet to answer the questions;
5. Do not write in this question paper.

THIS PAPER CONSIST OF THREE PRINTED PAGES

SECTION A (30 MARKS) – Answer ALL Questions

1. Distinguish between 'Digital Data' and 'Information', providing a workplace example where this distinction is important for effective decision-making. (3 Marks)
2. List two internet services commonly used in workplaces for efficient information exchange or retrieval. (2 Marks)
3. When collaborating on confidential documents using online platforms, what two cybersecurity best practices should team members implement to maintain data confidentiality and integrity, as required by workplace policies? (2 Marks)
4. Imagine you are about to submit personal documents for an online task. Describe two critical cybersecurity precautions you would take to protect your digital identity and sensitive information during this process. (2 Marks)
5. Explain why regular updates of operating systems and antivirus software are crucial elements of an effective cybersecurity strategy. (2 Marks)
6. Briefly define a "Distributed Denial of Service (DDoS)" attack and state one common objective of such an attack. (3 Marks)
7. State three reasons why periodically 'clearing cache and cookies' from a web browser is a good practice for both browsing performance and user privacy. (3 Marks)
8. Outline the key steps you would follow to perform an effective web-based search for critical business intelligence, and how you would verify the reliability of the sources, as required by workplace policies. (4 Marks)
9. Describe two distinct methods for backing up digital content, one online and one offline, and state a primary advantage for each method. (4 Marks)
10. You have just completed downloading sensitive project data from an approved online repository. Describe two immediate actions you should take to ensure the data is managed and stored appropriately according to workplace procedures. (2 Marks)
11. Identify two commonly used internet access applications and explain their role in facilitating access to and management of online information. (3 Marks)

SECTION B (40 MARKS) - Answer ANY TWO Questions

12.

- a) Your workplace policy requires all essential documents to be recoverable in case of system failure. Describe a comprehensive strategy for regularly backing up digital content, considering both local external storage and network/cloud storage options. (6 Marks)
- b) Explain the function of a Uniform Resource Locator (URL) and how browser bookmarks contribute to efficient navigation and re-accessing managed information. (4 Marks)
- c) How can specific features within an office suite application (e.g., filtering functions in a spreadsheet or version control in a word processor) be leveraged to manage and organize a large collection of research data efficiently, in adherence to workplace policies?(2 Marks)
- d) Explain four importance of observing copyright and data protection regulations (8 Marks)

13.

- a) Computers in your office have recently been infected with malicious software. As an ICT officer, we identify two types of malwares and state how each type affects a computer system. (4 Marks)
- b) Define the three core principles of data security and briefly explain the importance of each in maintaining a secure computing environment. (6 Marks)
- c) Describe three distinct internet security threats that could potentially compromise workplace data, as per cybersecurity policies. (6 Marks)
- d) Explain what constitutes a "social engineering attack" and provide two specific recommendations for employees to defend against such attacks. (4 Marks)

14.

- a) Your organization mandates robust password policies. Describe the essential characteristics of a strong password and justify its significance as a primary technical control measure in cybersecurity. (4 Marks)
- b) Distinguish between 'physical controls' and 'technical/logical controls' in cybersecurity, providing one relevant example for each in a workplace context. (6 Marks)
- c) How does adherence to the Data Protection Act (Kenya) influence an organization's protocols for classifying and managing sensitive information, particularly personal data of its stakeholders? (4 Marks)

- d) Peter being an ICT administrator, is required to ensure that all office data is protected from unauthorized access. discuss three data protection measures he would employ. (6 Marks)
